DID YOU KNOW?

The benefits provided under the plan can be claimed in the zone where the **main destination country** is located as well as **in the lower zones**. In other zones, cover is limited to **accidents and medical emergencies**.

For example:

If you have chosen the United States (zone 0) as the main destination country, you are covered all year round in zone 0 and in all the lower-level zones listed above for unforeseen and scheduled medical care.

Please note:

When calculating the price, it's important to specify the country or countries where you want to receive your care.

For example:

If you have chosen South Africa (zone 5) as the main destination country and plan to receive medical care in France (zone 4), you should select France under Cover Extension/Other Countries. Medical care will then be covered in zones 4 and 5.

You can select up to a maximum of **10 extension countries**. Cover will then be extended to the zone in which these countries are located. They will be listed on the insurance certificate.

Good to know:

You are also covered outside your cover zone as follows:

✓ **For healthcare and basic assistance:**

In the event of an accident or medical emergency during temporary stays of less than 90 consecutive days anywhere in the world with the exception of excluded countries.

To be covered for more than 90 consecutive days outside the cover zone, you should contact your APRIL advisor so that we can adjust your cover.

✓ **Other benefits:**

Benefits can be claimed worldwide and all year round (including in the country of nationality) with the exception of excluded countries.
